Product Presentation

Applicant Name: isBIM Limited

Product Name: AlphaBIM Project Management and Control Platform

Specification:

- ➤ Deployment: support both public and private deployment. Server side is deployed on Windows Server.
- ➤ Using both B/S and C/S structure, Support to operate on major browser like Chrome, Firefox etc.
- To at least meet the coordination work of 500+ users, through the load balance expansion, it supports higher level of user load.
- ➤ All major functions are modular in design and can be combined freely. The product is open, supports customization and can be integrated with other system.
- > Easy to deploy and install

Core Functions

- Multiple projects
- BIM Modeling
- Design Management
- > Construction progress management
- > Safety and quality management on site
- Construction daily log
- Document Management
- Project data overview

Technology Used:

- Visual Studio, .Net Framework 4.5
- Asp.Net MVC
- MariaDB
- > JQuery, Vue

Construction Process Involved:

- Progress
- Safety
- Quality
- Construction daily log

Key Improvement in Construction Process:

- improve management efficiency
- improve efficiency of communication
- centralise management
- model visualization

Job Reference:

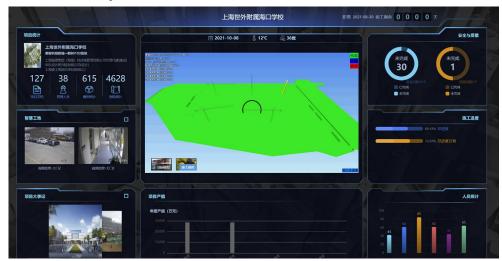

- Haikou Shiwai School Project, Haikou, Adoption, 2019
- CSCEC Project Control Platform, China, Adoption, 2020
- Haikou Hospital Projects, Haikou, Adoption, 2020

Innovative Features

- Construction daily log
- Core Technology
 - ➤ Vue, QRCode
- Comparison with current practice and popular models:
 - ➤ Show construction daily log based on calendar
 - ➤ Share construction daily log by QRCode
 - ➤ View construction daily log via mobile
- First Launch Date:
 - **>**2021.08.25

Adoption Example

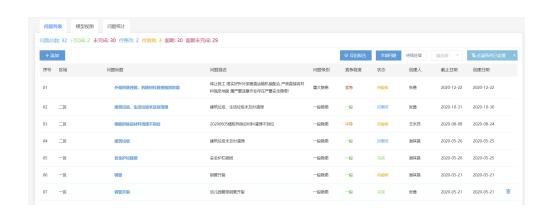

- Project for Illustration: Haikou Shiwai School Project
- Work Process:?
- Used Functions in project:
 - ➤ BIM Modeling
 - > Design Management
 - > Construction progress management
 - > Safety and quality management on site
 - > Document Management
 - Project data overview

Project data overview: show the project data via large screen

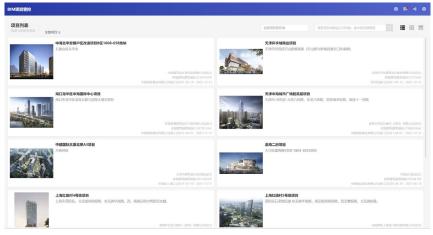

BIM modeling: show all models and view online

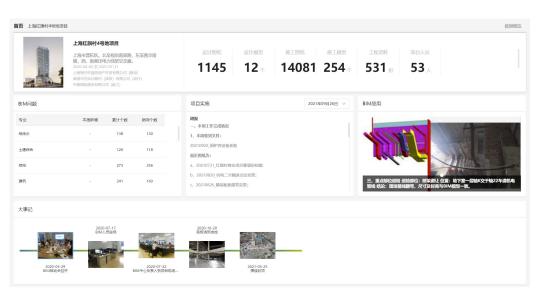

Safety management : manage all on site safety issues

Adoption Example

- Project for Illustration: CSCEC Project Control Platform
- Work Process:?
- Used Functions in project:
 - ➤ Multiple projects
 - > BIM Modeling
 - > Design Management
 - Construction Daily Log
 - > Safety and quality management on site
 - > Document Management
 - ➤ Project data overview

Multiple projects: manage more than 10 projects

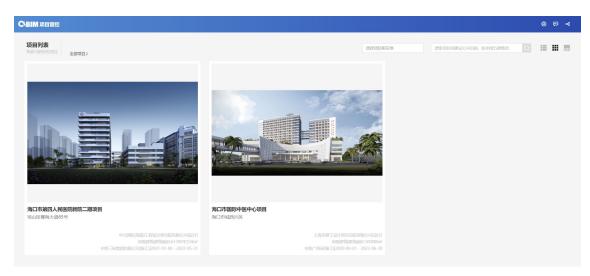

Project Data: show BIM issue, weekly report

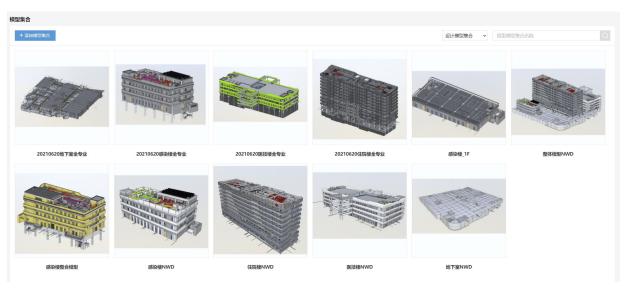

Construction Daily Log: manage construction daily log, share and view

Adoption Example

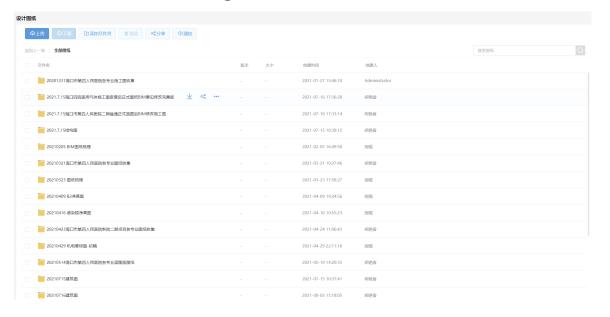

- Project for Illustration: Haikou Hospital Projects
- Work Process:?
- Used Functions in project:
 - Multiple projects
 - ➤ BIM Modeling
 - > Design Management
 - > Document Management

Multiple projects: manage 2 projects

BIM modeling: show all models and view online

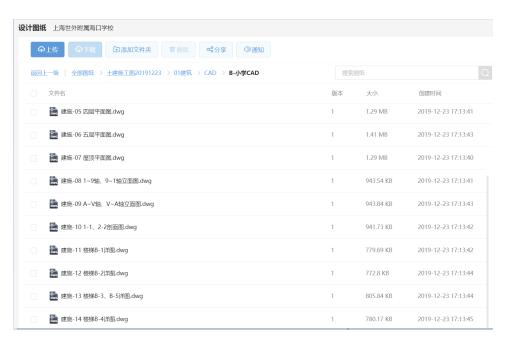

Design Management: manage all design documents

Benefits-Quality

- Improve quality by
 - ➤ Model visualization to reduce design issue
 - ➤ Manage document history to avoid data loss
 - >Track construction site issues' status in time
 - ➤ Track project status in time

Model visualization

Manage document history

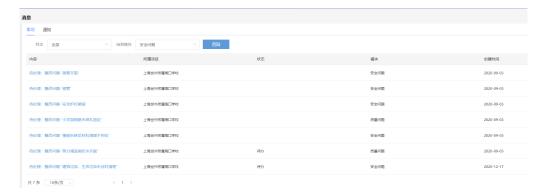

Track construction site issues

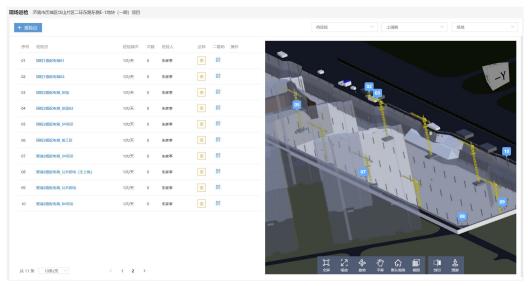

Benefits-Safety

- Improve safety by
 - ➤ Manage construction safety issues
 - > Require solving issues on time and warning
 - ➤ Manage site inspection

➤ Require solving and warning

Manage site inspection

Benefits-Environmental

 Improve Environmental Performance by:

问题统计

现场存在失效灭火器现象

楼层内个别消火栓水带缺失

4#地首层东侧电箱不合格 (现场这种 电箱较多)

电箱端子板无防护

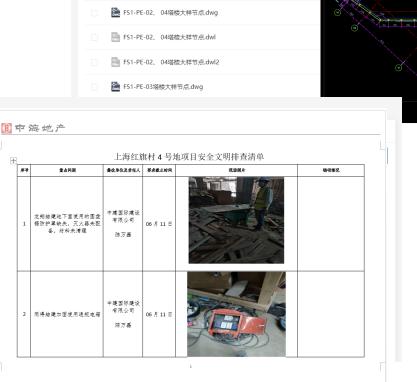

未完成: 43 (待整改: 43 待验收: 0)

- ➤ View design drawing \ pdf \ word on line and reduce paper waste
- ➤ Export data into report and reduce paper waste

待整改
